

A diagram illustrating a geometric shape and its components. On the right side, there is a solid black right-angled triangle. To its left is a white rectangular area. A thin green line starts from the top-left corner of the page, passes through the upper part of the black triangle, and then continues vertically down the right side of the white rectangle. Inside the white rectangle, there are four horizontal black lines, evenly spaced, representing a list or a set of data points.
